

Think **GREEN** REBATE PROGRAM

Greener home – greener wallet!

Check out our Think Green Rebate Program for valuable money-saving upgrades to your home. More details are available inside!

CoServ.com > **TOGETHER WESAVE** > Think Green Rebates

CoServ Electric offers a comprehensive residential rebate program for energy efficiency upgrades to your home.

CFL Program

Compact Fluorescent Lights (CFL) are much more efficient than incandescent bulbs, so there is a significant opportunity for savings with their use. According to ENERGY STAR®, CFLs last up to ten times longer and produce about 75 percent less heat than incandescent bulbs.

Residential members are eligible to receive up to \$50 worth of CFLs for their most frequently used fixtures when they have an energy audit performed on their home. (Schedule an energy audit today—energyaudits@CoServ.com.) Qualifying CFLs include recessed can lights, ceiling fan bulbs and globes.

ENERGY STAR® Home Rebate

Members who build ENERGY STAR rated homes (that closed after Jan. 1, 2011) are eligible to receive a \$550 rebate by submitting the ENERGY STAR certificate and builder signature verifying that the home meets ENERGY STAR standards.

Savings are based on cumulative heating, cooling, and hot water energy use and are typically achieved through a combination of the following: high performance windows, controlled air infiltration, upgraded heating and air conditioning systems, tight duct systems, high-efficiency water heating equipment, and high-efficiency building envelope standards.

ENERGY STAR® Window A/C Unit

Purchase an ENERGY STAR qualified (10.8 EER or higher) window unit and receive a \$30 rebate with proof of purchase and a copy of the Energy Guide label located on the product.

ENERGY STAR® Dishwasher

Members who purchase an ENERGY STAR qualified (.65 EF or higher) dishwasher will receive a \$15 rebate with proof of purchase and a copy of the Energy Guide label located on the product.

High Efficiency Water Heater

Members who replace an existing electric water heater with a high efficiency (.94 EF or higher) electric water heater will receive a \$37.50 rebate with proof of purchase and a copy of the Energy Guide label located on the product.

HVAC Tune-up Rebate

Residential members can receive up to a \$150 rebate on an HVAC tune-up performed by a qualified service professional. HVAC tune-ups and maintenance help to keep heat pumps and central air conditioning units running at top efficiency, prevent equipment failures, and extend the life of the equipment.

The rebate is contingent on the member participating in an energy audit and providing a receipt from a qualified technician stating that the required work was completed.

Heat Pump Rebate

Members who replace existing HVAC equipment (in electric-only, single-family homes) are eligible to receive a \$150 rebate for a 14 SEER (with an HSPF of 8.2 or more) High Efficiency Heat Pump and a \$300 rebate for a 15 SEER (or higher—with an HSPF of 9.0 or more) High Efficiency Heat Pump.

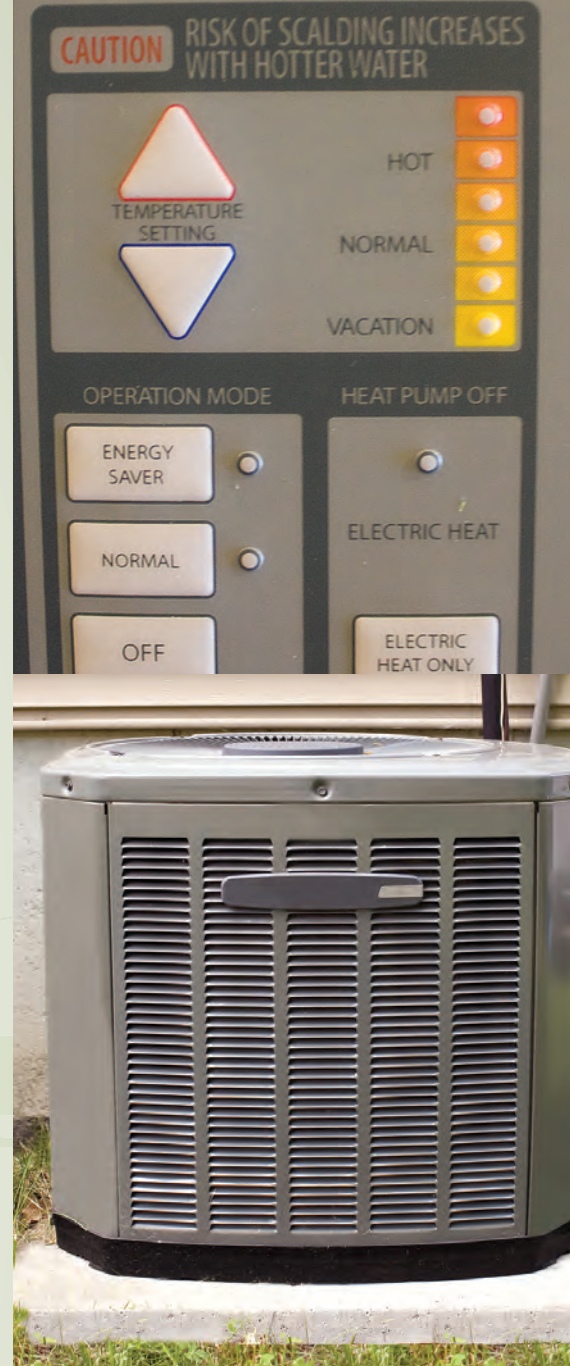

The member must obtain a receipt with the Air-Conditioning Heating and Refrigeration Institute (“ARI”) designation from the installing contractor for verification purposes.

Solar Energy Rebate

CoServ supports interconnected co-generation with net metering—per the terms of our tariff. We now offer a \$2 per watt rebate on solar generation (with a \$5,000 cap per member installation) until allocated funds are depleted.

Federal Tax Credits and Deductions

Check out [CoServ.com](https://www.coserv.com) for information about a variety of tax credits and deductions available for residential and commercial consumers.
