### Please explain why you are interested in serving on the CoServ Electric Board of Directors.

Currently serving my second term. With the experience I have gained through my first 2 terms, and the leadership training I have received from the NRECA, I have gained the knowledge necessary to continue serving our Members, and be the fiduciary representative for all of our Members.

### How many CoServ Electric Annual Membership meetings have you attended in the past 5 years?

5

### What qualities do you possess which would make you an asset to the CoServ Electric Board of Directors, and what is your experience serving on boards of this type?

Being a Member of the board I have been an integral part in overseeing the massive growth, and challenges that come with it.

I have served as the Board President at St. Philip's Episcopal School of Frisco. Currently I am the Chairman for the Denton County Civil Service Commission. I served my hometown community (Frisco) on numerous boards, and commissions. Along with the training I received to become a credentialed director, I feel I have the experience necessary to continue to serve as your board representative in District 4.

### What do you feel is CoServ Electric's biggest challenge?

CoServ continues to be a leading example in the business community and the electric cooperative world. That comes with great responsibility. We continue to lead in innovative practices that allow us to keep our rates low for our Members. We offer alternative sources of energy with our solar farms. Our Nest program allows us to keep our peak demand out of the peak times, keeping CoServ's energy rates low for our Members. Our biggest challenge is continuing to be innovative and listening to our Members so we can continue to serve them in the best manner possible.

### Please describe how you feel CoServ Electric is performing in its service to its Members and what you hope to contribute to its success.

CoServ has, and will continue to work with our city, county, and state officials. This has been a staple in getting projects accomplished in our communities. This serves our Members in being able to deliver the most reliable, and safe energy to our Members. With these relationships, CoServ continues its ability to be innovative and work through solutions with our leaders, keeping our Members' rates low. Board Members work with fellow Members and our leaders to ensure that CoServ continues to strive to be the best in our industry.
