Serving Communities, Making Connections

Clint Bedsole CoServ Electric Board Director, District 4

Recently, I participated in our first CoServ Charitable Foundation Open benefiting Wounded Warrior Project, which raised more than $25,000 for those who have served our country and sacrificed much. We’re also investing in our collective future with $20,000 in scholarships to area seniors, expansion of our youth tour sponsorships and dedication of our new Solar Station, which offers expanded renewable energy. If you ever have any questions, please don’t hesitate to contact me at ClintBedsole@coserv.com.

ACADEMIC INITIATIVES

CoServ has exciting updates for two of its Academic Initiative programs. We have added $5,000 to our W. Tip Hall Jr. Scholarship Program so that four worthy students who plan to attend an institute of higher learning in Texas will be awarded $5,000 each.

We’ve also expanded our Electric Co-op Youth Tour sponsorship to include three students on the all-expenses-paid tour of Washington D.C. For the second year in a row, the tour departs from Austin, meaning students will have a day to see the Texas State Capitol as well.

We’re proud to participate in the NRECA tour and proud of the students we send. For eligibility requirements and the applications for both initiatives, click on the Community tab of CoServ.com.

SPOTLIGHT

CCF Open raises more than $25,000 for Wounded Warrior Project

Bill Ragsdale and I were among the 96 golfers participating in the CCF Open benefiting Wounded Warrior Project, which brought in around $25,000 for the organization that provides assistance to service men and women injured in the line of duty.

It was an honor to participate in this inaugural event sponsored by the CoServ Charitable Foundation (CCF).

It is important to me and to all of us at CoServ to give back to the communities where we provide service. Our mission is not only to deliver excellent service to our Members and Customers by providing safe and reliable energy solutions, it is also to be a respected leader dedicated to implementing innovative ideas that fulfill the needs of those we serve.

And that’s where the CCF Open came from. Thank you to those who participated and to those who serve or have served our country.

Visit CoServ.com for daily updates from our social media channels and Inside the Lines blog.
Innovation is what it takes to be good stewards for our Members. And we are ahead of the curve among cooperatives across the nation with the recent dedication of our new CoServ Solar Station. The 2 MW AC facility is located on 16 acres in Krugerville where peanuts were once grown. Today, the farm offers a common-sense approach to renewable energy for our Members.

The facility is part of the Solar Utility Network Deployment Acceleration (SUNDA) project, a joint initiative between the Department of Energy and the National Rural Electric Cooperative Association (NRECA).

Now is the right time for us to bring the community solar approach into the light where our Members can join us in this new energy solution. The future indeed looks bright.
